

Curved Inflatable Arch - Tethered

This template is to be used as a guide for logo placement. We will ensure all completed templates are reproduced on to a 3D visual for customer approval.
The materials used to manufacture an arch combined with the constant / sealed air requirement will all influence final completion size.
We will always endeavour to keep to the sizes shown on the website, however, where a very specific size is needed please let us know and we will ensure exact instructions are followed.

File Format: PDF and TIF
